ITEM 7. FISCAL 2024 FINANCIAL SUMMARY

Revenue for fiscal 2024 was a record $60.92 billion, up 126% from $26.97 billion in fiscal 2023. Gross margin increased to 72.7% from 56.9% in the prior year, primarily reflecting the transition to high-value accelerated computing systems.

Operating income surged to $32.97 billion, up 681% year-over-year. Net income grew 581% to $29.76 billion, with diluted earnings per share of $11.93 compared to $1.74 in fiscal 2023.

Market Platform Revenue (in millions):

Platform	FY2024	FY2023	Growth (%)
Compute & Networking (Data Ctr)	$47,405	$15,013	+217%
Gaming	$10,447	$9,067	+15%
Professional Visualization	$1,553	$1,544	+1%
Automotive	$1,091	$903	+21%
OEM and Other	$426	$445	-4%
Total Revenue	$60,922	$26,974	+126%

DATA CENTER PLATFORM ACCELERATION

Data Center revenue represented 78% of total company revenue. Growth was driven by the NVIDIA HGX platform leveraging Hopper architecture GPUs (H100, H200) and Quantum-2 InfiniBand networking fabric.

Enterprise software offerings, including NVIDIA AI Enterprise, achieved an annualized run rate surpassing $1.0 billion as cloud providers, sovereign AI nations, and Fortune 500 corporations adopted full-stack accelerated computing.

RISKS AND EXPORT RESTRICTIONS

U.S. government export control licensing requirements on high-performance semiconductors and advanced packaging sent to China and specified destination countries impacted shipments. While custom compliant chips were introduced, competitors and local alternatives in foreign jurisdictions pose market share risk.

Concentration of supply chain manufacturing at Taiwan Semiconductor Manufacturing Company (TSMC) for CoWoS (Chip-on-Wafer-on-Substrate) advanced packaging remains a critical dependency.
